

Hamilton Café Carib

If you haven't been able to find Café Carib in your local store don't despair.

You can help by going to your favorite store where you buy other Hamilton rums and asking for this cold-brewed coffee liqueur made with Jamaican rum, Nicaraguan coffee and just enough sugar to balance the blend.

Take this page to a store, show them this picture of the bottle and ask them to order it for you.

You can make a difference.

The Breezeway Blend got started by people like you going to stores and asking for it.

Two years after that product was introduced it became my sixth best selling product under the Hamilton label.

The UPC code is 000513081534
